

## Hand in #4

### Deadline on it's learning

1)

Document your updated design of your data warehouse and the initial load of data

- Dimensions should reflect a design allowing for type 2 changes.

2)

Document your work (the code + comments in the code) on populating your dimension tables (not the Date dimension) and the fact table, with data from 01-01-1996 to 31-12-1997

- Create a table to handle last update day and time and set first row to 31-12-1997

3)

Document your work (the code + comments in the code) on the incremental load of data, including the code for handling changes in the dimension data (Type 2 changes)

**The handling must include all dimensions except the Date dimension**

Please put it all in 1 (one) PDF document 😊
